Implemented by local communities & KHEN

Presnted by KHEN Cambodia- Nov 2016

project Getox has broght the impact of behavior changes

No.	School Name	% of Baseline Survey	% of progressive Line survey
1	Chomnop Korki	50% (Rain water, boil water)	100% (In the school have the filter to treat the water for student)
2	Chomnop Sbov Plang	10% (not clean water and rain water from the jar that don't have the lid)	100% (Community contribute in budget with school to by the pour water to put in the school for student drinking)
3	Au Romcheik	10% to 20% (rain water, boil water and the water from the river)	90% (Student drinking clean water in the tank in the school, and some student are bringing clean water from home)
4	Au Taseik	50% (Water from the river)	70% (Boil water)
5	Au Choam Kroam	71% (Boil water, rain water and stream water)	95% (Boil Water)
6	Doun Tret	60% (Boil and rain water)	97% (Boil water)
7	Sok San	24% (Stream water, Pour water and boil water)	70% (70% = For all old students that study in Sok San Community school, teacher motivated to take clean water from home to drink in the school, So they took clean water to drink in the school. But 30% more that mean new student that just come to school, so they are not yet take water to drink in the school)
8	Phnom Russey	20% (Stream water, Rain water and boil water)	70% (70% = For all old students that study in Phnom Russey Community school, teacher motivated to take clean water from home to drink in the school, So they took clean water to drink in the school. But 30% more that mean new student that just come to school, so they are not yet take water to drink in the school)
8	Peam Ta	20% (Rain water and boil water)	95% (Boil water)

Achievements!

➤ Chomnop Korki Community School

➤ Au Tasek (Koe Mony) Community School

➤ Doun Tret Community School

➤ **Au Choam kroam Community School**

Earlier!

1-Ou Tasek/Keo Mony Community

- Activities of students

now

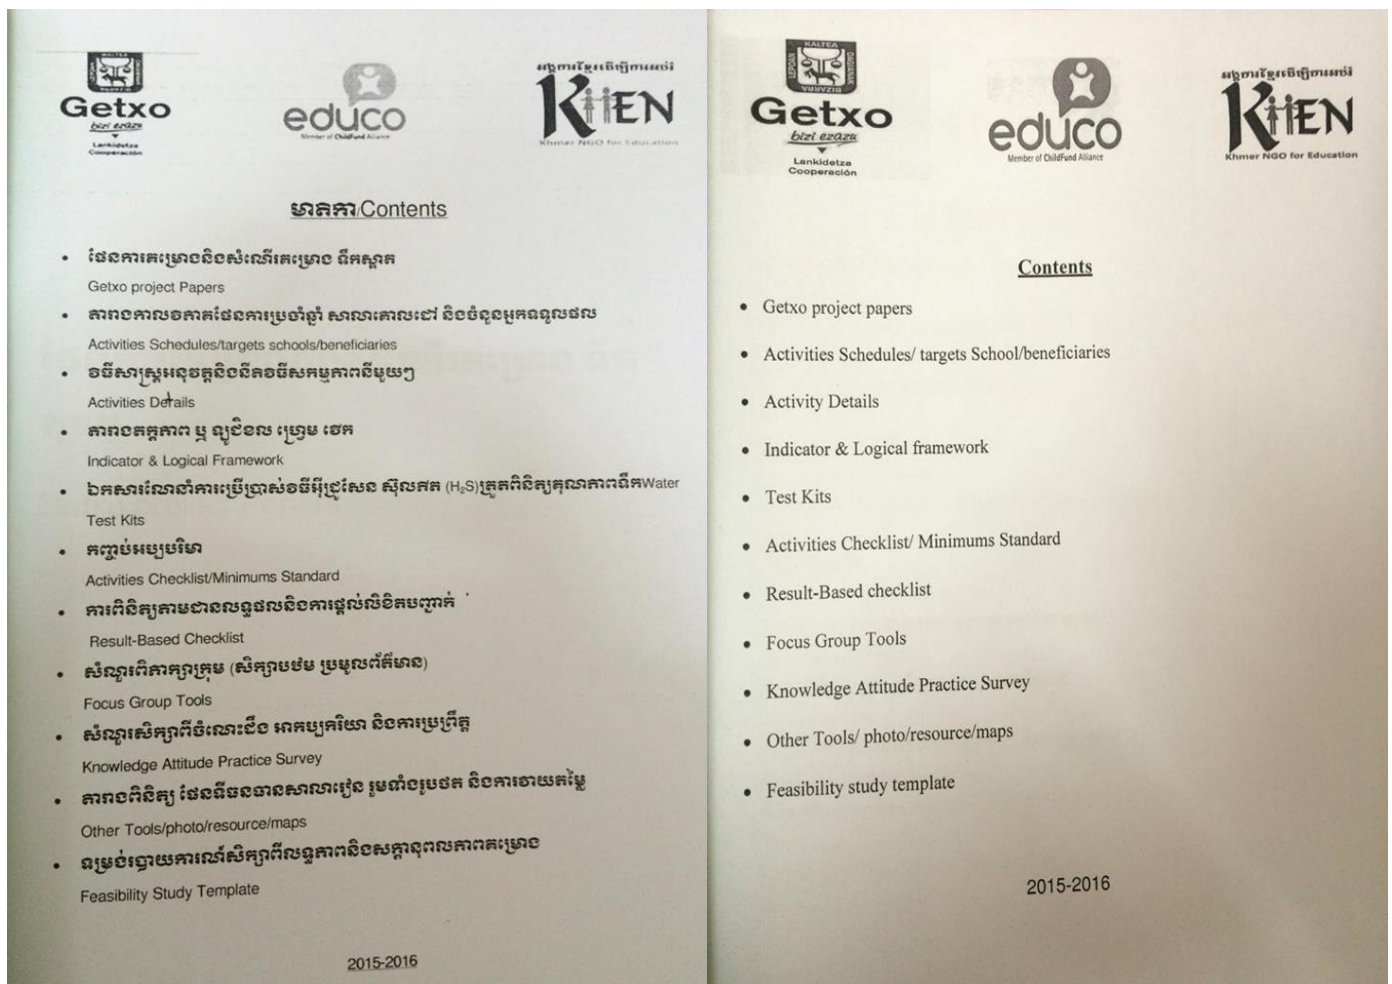

& recent

All we do is for the best sake of our rural students having water to drink at schools, and that is “Right to clean WATER!”

How we start and do our works!

- 1- Developed of Mnaual on Project Papers, Procedures, Guidelines, toolkits and M&E tools (Khmer and English Version) for Implementation of “Getxo -Guaranteeing access to water and the right to Education in a healthy environment in community schools in Rukhakiri and Somlout, Cambodia.”_

2- Training and orientation to all and responsible Staff and managers on Getxo project 1617

3- Project training and orientation to key school responsible and community/stakeholders

4- Guideline/procedure development & consulted and feasibility studies conducted

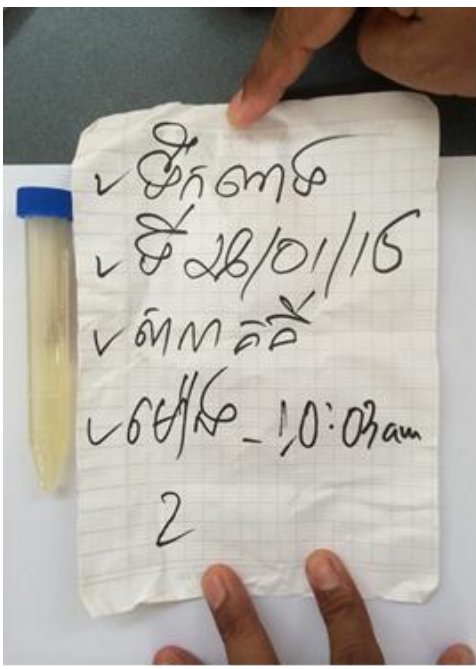

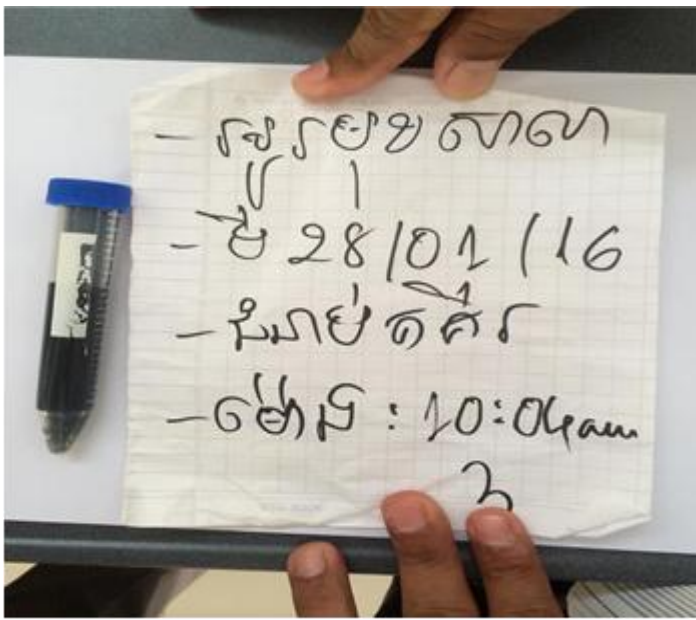

5- Orientation and guideline introduction on Getxo compliance and financial/reports requirement (with Educo team visiting)

6- To perform about project and Test the Water

7- Training's Water Support Committee about WASH & Water Safety Planning (teachers, director, SSC)

The Activities of Donor visit School/monitoring of project sites

❖ Training Section & Introduction of Rain water harvesting system

8- Technical Construction Manual

9- Using and Maintenance Manual

10- Hand Washing stationing Manual

វគ្គបណ្តុះបណ្តាលស្តីពីបច្ចេកទេសសាងសង់ ការប្រើប្រាស់ ការជួសជុល និង
 ថែទាំទៅលើប្រព័ន្ធគ្រងទឹកភ្លៀង និង បរិក្ខារលាងដៃជាក្រុម

ខេត្តបាត់ដំបង ថ្ងៃទី ១៧-១៨ ខែ ឧសភា ឆ្នាំ ២០១៦

11- The process of rain water system's construction

➤ Before & starting

➤ After

➤ The place for Hand washing and The activities of Student washing their' s hand

➤ The activities of student that take clean water from home & promotion of safe water drinking

12- Tank system's painting in Au Taseik and Chomnop Korki Community School

Kien : “When “A Child go to work, and not go to school”, it is clear that is to “Abuse the right of the child”! And every adult is fully obliged to take seriously on actions to help addressing!,

And when there is no clean or safe water to students, we need to advocate, and make it happen together”

WE are grateful to Getxo/Educo fund

“Clean Water is Child Right”
